CHAPTER 1

saltstack-windows-test-kitchen-examples

This is an example of how to test a saltstack windows formula using test kitchen and kitchen-salt.

Local testing can be done from a Windows 10 workstation using a powershell console or WSL with virtualbox or hyper-v.

```
$kitchen list
Instance                     Driver   Provisioner  Verifier  Transport  Last Action ␣
↪  Last Error
py3-windows-10-1903          Vagrant  SaltSolo     Inspec    Winrm      <Not Created>
↪  <None>
py3-windows-10-1809          Vagrant  SaltSolo     Inspec    Winrm      <Not Created>
↪  <None>
py3-windows-10-1803          Vagrant  SaltSolo     Inspec    Winrm      <Not Created>
↪  <None>
py3-windows-10-1709          Vagrant  SaltSolo     Inspec    Winrm      <Not Created>
↪  <None>
py3-windows-server-2019-1809 Vagrant  SaltSolo     Inspec    Winrm      <Not Created>
↪  <None>
py3-windows-server-2016      Vagrant  SaltSolo     Inspec    Winrm      <Not Created>
↪  <None>
py3-windows-server-2012r2    Vagrant  SaltSolo     Inspec    Winrm      <Not Created>
↪  <None>
```

Online CI testing can be done using test kitchen with AppVeyor.
